TIES456 demo 5

Aleksi Pekkala (alvianpe@student.jyu.fi)
9.10.2017

Heroku deployment

- demo 1: https://ties456-demo1.herokuapp.com/
- demo 2: https://ties456-demo2.herokuapp.com/
- demo 4: https://analytics-rest.herokuapp.com/
- The first two were deployed with Heroku WAR deployment:
  - `heroku apps:create --region eu ties456-demo1`
  - `heroku plugins:install heroku-cli-deploy`
  - `heroku war:deploy <path_to_war_file> --app ties456-demo1`
- Demo 4 Python app was deployed with Git:
  - add a Procfile: `web: gunicorn run:app --log-file=-`
  - define app dependencies in a Pipfile
  - add one (free) container: `heroku ps:scale web=1`
  - add MongoDB add-on: `heroku addons:create mongolab:sandbox`
  - commit and push to Heroku remote: `git push heroku master`
